PROFILE

Passionate Frontend Developer and Educational Technology student with a solid foundation in web development (HTML, CSS, JavaScript) and core programming logic (Python, C++). Experienced in building interactive, user-focused educational platforms and games. Currently expanding my skill set with React.js. Eager to bring my problem-solving skills and creative technical solutions to a dynamic frontend role.

Innovative Educational Technology student and aspiring Frontend Developer. I bridge the gap between education and technology by building engaging digital platforms using HTML, CSS, JavaScript, and Python. With a proven record of academic excellence and a strong grasp of object-oriented programming, I am continuously learning (currently exploring React.js) to build impactful, interactive web applications.

SKILLS

HTML5 & CSS3 JavaScript (ES6+) Bootstrap React.js (Currently Learning)

- Python
- C++
- Object-Oriented Programming (OOP)
- Problem Solving

EDUCATION

Bachelor's Degree in Educational Technology and Digital Learning

09/2023 – 07/2027

Faculty of Early Childhood Education, Cairo University

Giza, Egypt

- **Current Grade:** Excellent (for all three academic years).
- **Focus:** Bridging the gap between technology and education by developing digital learning tools and interactive platforms.
- **Key Projects:** Applying web development skills (HTML, CSS, JS) and programming (Python, C++) to create educational games and platforms (e.g., Rawdati platform).

LANGUAGES

English

- **Certificate:** A2 Level Certificate from the British Council, Cairo.
- **Note:** Actively working on improving proficiency
